あとがき

Thank you for buying the third volume!
Maris' growth to adulthood in these three volumes must be thanks to you!

In the first volume, Maris was based off of a 3-year-old boy.
That boy is already in middle school.
That's quick. No, it wasn't quick!
Just up until recently, he's been clinging to me and saying "brother, brother"!!

Children really can become an adult in the blink of an eye.
Because now, everyone is waiting for children around Maris!
As you can, please touch them! Don't get tired of them, and be playful!
Don't hate them and make some memories!

I'll say it one more time.
Children can really become an adult in the blink of an eye!

The day that Iijima-sensei will not be a playmate to the boy is drawing close.
We go out eating, we go out to watch baseball and soccer, and then we make memories together.

...Well, he's becoming more and more adult.
But again, the different kind of cuteness will come out (lol)
